

[Espoo, Finland - November 9, 2015] For Immediate Release

## DEOMO ROLLS THREE MEGAPHENOMENA INTO ONE PRODUCT AND IS LOOKING FOR SEED FUNDING

Don't we all want to maintain our well-being, feel physically great? Lately, health has been the focal point for many technology companies. As a result, you may have a device checking your pulse and counting how many steps you have taken today. "Sitting is the new smoking" has been said. Get up and move is the new movement!

Haven't we all been touched by music in some way? Music has the power to stir our souls. Especially when trying to twist and bend fingers on a guitar fretboard to form a perfectly sounding chord.

Doesn't lightsaber wielding look cool? It's a bit like Kendo, the old Japanese martial arts.

Deomo has combined three massive phenomena into an unprecedented musical instrument. The instrument gives musicians more freedom, more expressiveness, more options. And a physical playing style. All wrapped in simplicity itself. We gravitate towards simple things.

Aimed for global market, the novel instrument will power up an IP portfolio with its licensing possibilities.

### ABOUT DEOMO

Deomo designs and disrupts across domains. That covers online services, mobile apps, physical products among others where advance, adding inspiration, well-being and value are inherent. The domain is always global and chosen carefully.

Deomo is currently looking for seed funding.
